This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PART IV.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1893.

EXHIBITS—CONTINUED.

TABLE XII.—RATES OF WAGES FOR 52 YEARS—Continued.

[In certain establishments the payrolls failed to show daily rates for all occupations, hence while most of the establishments here presented are substantially complete, very few are actually so, and some exhibit only leading occupations. The following may be said in explanation of this condition of affairs: Average daily earnings have been given for piece workers where possible, but in many instances no record of time was kept and it was, therefore, impossible to give such earnings. In many of these cases it was also impossible to secure a piece rate, owing to lack of uniformity in the description of the unit during the various years. In addition to these, such occupations as were considered not strictly industrial and in which the rates of pay were very irregular, as officials, clerks, etc., were omitted. In a few instances the condition of the payroll itself made it impossible to secure a complete presentation of certain occupations. The occupations, however, which are given are substantially complete.]

TABLE XIII.—RATES OF WAGES FOR 52 YEARS IN THE COAL, IRON, GLASS, AND POTTERY INDUSTRIES.

[The data for this table were furnished by Mr. Joseph D. Weeks, of Pittsburgh, Pa.]

ANTHRACITE COAL.

RATES OF WAGES PAID MINERS ON COMPANY WORK AT ANTHRACITE COAL MINES IN LUZERNE COUNTY, PENNSYLVANIA.

[The wages given in the following table from 1840 to 1867, inclusive, are those paid at the mines of A. Pardee & Co., in and near Hazleton. The rates from 1868 to 1892, inclusive, are those paid at the mines of Coxe Bros. & Co., Drifton, Pa. It should be noted that these are rates paid miners when doing company work, and not those paid miners on contract work.]

BITUMINOUS COAL.

WAGES PAID IN MINING BITUMINOUS COAL IN FIRST AND SECOND POOLS OF THE MONONGAHELA RIVER, NEAR PITTSBURGH.

[The rates given from 1840 to 1857, inclusive, are the rates paid per 100 bushels. It is assumed that the average product of the miner per day, when work is steady, is 100 bushels, which would make the rate given as the price per 100 bushels the daily rate of earnings. It should be said in regard to this, however, that some miner will mine more than 100 bushels a day and others less. It should be noted that work has been much more steady throughout the year in the later years covered by this report than in the early years.]

GREEN GLASS BOTTLES.

AVERAGE DAILY EARNINGS OF THE GREEN GLASS BOTTLE BLOWERS OF NEW JERSEY, WHEN WORKING ON VARIOUS SIZES OF BOTTLES.

[The year dates from September 1. For the last ten years, work has been suspended quite generally during the months of July and August, owing to the extreme heat. Before that time there was no universal rule as to summer work, though it was customary in many, if not most, of the factories in New Jersey to cease work June 1. The wages, therefore, are given for this year, which is termed a "fire," instead of for the calendar year. The fire of 1840–41 would be from September 1840 to May 1841.]

TABLE XIII.—RATES OF WAGES FOR 52 YEARS IN THE COAL, IRON, GLASS, AND POTTERY INDUSTRIES—Continued.

IRON ORE MINING.

RATES OF WAGES PAID BLASTERS AND DRILLERS IN THE NEW JERSEY ORE DISTRICT.

[It is impossible to determine a single rate of wages for any one year with absolute certainty, because of the various elements which influence the men and the employers. For instance, a man working in a shallow, dry, and comfortable mine will not receive as high wages as a man working in a deep and wet mine. Then, again, a miner located in a retired locality or in a farming region could frequently get board for less than those working in a mining town where all articles of food must be brought from a distance.

Another element of uncertainty is the custom of some operators of letting the work by contract to a party of men who receive their pay *pro rata* according to the number of days that the gang worked, so that the payrolls would show as many rates in a single month as there were gangs of small contractors.

The introduction of power drills causes another uncertainty. During the last 15 or 20 years the drill runners have received from 15 to 25 cents a day more than the other men who may have been able to drill by hand.

The introduction of the eight-hour system reduced wages, because, while the rate remained as before, the men would have received higher wages if the time had not been changed. The eight-hour system is not universal in this region. Often the eight-hour and the ten-hour systems exist in the same mine, the length of the working time being regulated by the conditions of the different parts of the mine.]

IRON ORE MINING—Concluded.

RATES OF WAGES PAID IRON ORE MINERS AT THE OXFORD MINES, NEW JERSEY.

[In 1840 and up to about 1854, 12 hours constituted a day's labor. In 1854 it was reduced to 10 hours. About 10 years ago a system of drilling 10 feet for a day's work was adopted; that is, when a gang of three miners, two striking and one holding the drill, had drilled a series of holes aggregating 10 feet in depth, each man was entitled to a day's pay. This kept them in the mines 7 to 7½ hours. This custom was started to favor the men who were working in a very wet place at one of the mines, and is now the rule at the Oxford mines, though at no other in the vicinity. The wages given in the table are for the man that holds the drill, and not for his strikers.]

POTTERY.

WAGES PAID IN THE MANUFACTURE OF WHITE WARE IN THE POTTERIES OF NEW JERSEY.

[These are net earnings of the men after making all payments for assistants and for steam, where it is used. They are as near the average as can be ascertained, and have been secured chiefly from the time-books of workmen themselves. There is an inclination on the part of potters—even more so than in most other trades—to keep their earnings a secret. In the early days one potter rarely knew what others made. Where wages have been ascertained from manufacturers, as well as workmen, they differ somewhat. The reports of the manufacturers, as a rule, show higher wages than those given by the workmen.]

TABLE XIII.—RATES OF WAGES FOR 52 YEARS IN THE COAL, IRON, GLASS, AND POTTERY INDUSTRIES—Concluded.

WINDOW GLASS.

WAGES OF WINDOW GLASS BLOWERS AND GATHERERS IN NEW JERSEY.

[These are the average net earnings (after making all deductions) of blowers working on the different sizes of single strength glass. The wages of double strength blowers per box from 1840 to 1880 are said to have been double those paid for single strength, but until quite recently only a small amount of double strength glass was made in New Jersey, most of the factories of that state running on the smaller sizes, for which but little double strength glass is used. The earnings, however, of the double strength blowers were not double those of the single strength. The work of the former is more fatiguing and less hours are worked, so earnings are somewhat less than double. Since 1880 the scale of wages on double strength glass has been one and three-fourths times that of single strength. In 1880 the proportion of double strength was about one-twelfth.

To melt and blow out a pot of glass requires a little more than 24 hours, of which time the blower is employed about 6 hours. In the early years up to the blast of 1849–50 six blows or melts a week were made. Since that time all Sunday work has been abolished and but five melts a week made. Up to 1849–50, therefore, the weekly earnings were six times the amounts given; since then but five times.

In some years the gatherer has been paid by the blower; in others by the firm, and in still others partly by the firm and partly by the blower. In all instances, however, all amounts paid by blower have been deducted. The wages given are net.]

FOOD, CLOTHING, ETC.

[The following descriptions of articles are for 1890 or 1891, none being obtainable for the preceding years or for the other articles. Beans: Shall be "prime" American marrow beans, hand-picked, of the crop immediately preceding the date of advertisement for the same, and shall weigh 64 pounds to the bushel. Fresh beef: Shall be good in quality and condition, fit for immediate use, and from fore and hind quarter meat proportionately, including all the best cuts thereof. Beef from bulls, stags, or diseased cattle shall not be delivered. The necks shall be cut off at the fifth vertebral joint, and the breasts trimmed down. The shanks of fore quarters shall be cut off 8 inches above the knee joint, and of hind quarters at the round joint. Necks, shanks, and kidney tallow shall be excluded from delivery. Coffee: Shall be green Rio coffee, No. 3 grade. Wheat flour: Shall be good, "straight," extra No. 1, of a superior color and strength, manufactured from the best winter wheat, of the crop immediately preceding the date of advertisement for the same. Molasses: Shall be "pure sugar" syrup, known as "straight cane syrup," and free from adulterations; shall be of good flavor, and shall weigh not less than 12 pounds to the gallon. Salt pork: Shall be packed from corn-fed, well-fattened hogs, slaughtered during the regular season, and so cut that the pieces shall run not less than twenty-five nor more than thirty-five pieces to the barrel. Heads, jowls, necks, shoulders, hams, legs, feet, butts, rumps, lard, and all refuse pieces must be excluded. The pork shall be such as is known as family mess or short mess pork, and shall be thoroughly salted with at least one statute bushel of best salt for the purpose to each barrel, exclusive of a pickle, which shall be made from fresh water, as strong as salt can make it, and be perfectly bright and clear. Each barrel shall contain full 200 pounds net weight of pork, and no excess of weight shall be charged for. Raisins: Shall be the best quality of domestic raisins. Rice: Shall be "strictly prime" Carolina or choice Hawaiian rice, of the crop immediately preceding the date of advertisement for the same. Sugar: Shall be "standard granulated." Tea: Shall be choice Formosa Oolong No. 1 tea, of the crop immediately preceding the date of advertisement for the same. INTERNAL-REVENUE TAX ON SPIRITS.

TWENTY-NINTH STREET AND GRAY'S FERRY ROAD,
Philadelphia, Pa., June 26, 1893.

Hon. NELSON W. ALDRICH,
United States Senate, Washington, D. C.

SIR: I beg leave to hand you herewith duplicate of a letter I have this day sent to Mr. Roland P. Falkner.

Very respectfully,

HENRY BOWER.

TWENTY-NINTH STREET AND GRAY'S FERRY ROAD,
Philadelphia, Pa., June 26, 1893.

ROLAND P. FALKNER Esq.,
Statistician, Senate Finance Committee, Washington, D. C.

SIR: I beg leave to say that I find in the Philadelphia Record of Thursday morning, June 22, a dispatch from Washington dated June 21, stating that your report is about to leave the printer, also giving some figures. Among others, I find, taking the prices of 1860 at 100, drugs and chemicals in 1891 had fallen to 86.3.

This percentage is evidently largely increased by the fact that the internal-revenue tax on distilled spirits is added to the price. As you will observe by No. 27 of the price list of chemicals, the price of alcohol began to rise in 1863, carrying until this date different rates of tax per gallon. In 1891, the price averaged $2.26; deducting from this the tax, $1.80, leaves the value of a gallon of alcohol in 1891, 46 cents. In 1860 it was somewhat higher, reaching an average of 47½ cents.

You will observe that the change in the figures will change your percentage very materially. I hope the correction is made in due time, either in the body of the report or as a foot note, as it would be an imperfect report without this alteration.

I regret that I have not had the opportunity to look at the proof sheets of your report, so that I could have detected this discrepancy at an earlier period.

Yours truly,

(Signed.) HENRY BOWER.
